Epopulogn 3

Δίνεται σύνθεση φορείο σύχχρονου κινητώρα και παθητικώ φορεία με στοιχεία:  $S_{\varphi} = 50 \text{ kVA}$ , τουρ=9,8 επ. Ο κινητώρας έχει χαρα κτηριστικά:  $S_{N} = 100 \text{ kVA}$   $U_{N} = 400 \text{ V}$   $S_{N} = 50 \text{ Hz}$   $P_{k} = 00 \text{ kW}$   $P_{k} = 80 \text{ kW}$ 

a) ZI, ωστε να έχουμε ZI=I β) δ=;
γ) Αν μειωθεί 20% η τόση διέγερσης ποιο ο νέος συνολικός ZI
